

HOIST GROUP CHOOSES FLAMINGO HEAD-END

Paris, April 01, 2016 – A few days after Anevia announced its new Flamingo head-end, Hoist Group, which supplies solutions, equipment and services for hotels and healthcare facilities internationally, chose Flamingo to be the head-end for all of its TV solutions.

Flamingo delivers video content from satellite, cable and DTT signals to decoders, TVs, PCs, and other display devices connected through IP or coaxial networks.

Announced on 31 March 2016, the new Flamingo is the culmination of Anevia's extensive expertise in non-linear video services. It has new features that will offer customers a large number of additional video services such as timeshift and video-on-demand.

Among the many innovations announced, special emphasis has been placed on monitoring, which gives installation partners and their clients the ability to remotely manage their machines, greater operational efficiency and ultimately lower operating costs.

“There were several reasons for this choice,” said Marc Valentin, CTO of Hoist Group. “First of all, technical expertise, then, long-lasting scalable architecture and finally the density of the platform. Furthermore, the ability to protect content in accordance with the increasingly urgent requirements of rights holders supported our decision,” he concluded.

“We are very pleased to note that our new head-end meets the innovation and quality needs of an industry leader like Hoist Group,” said Damien Lucas, CTO and co-founder of Anevia. “This new design allows us to continue our technological partnership with the Hoist Group and offer a number of innovations in terms of the TV experience on the hospitality and healthcare markets,” he added.

About ANEVIA

Leader in OTT and IP software solutions for the delivery of live television and video-on-demand, Anevia was founded in 2003 by the developers of the VLC media-player. Anevia has pioneered cloud DVR and multiscreen solutions by providing innovative technologies which enable viewers to watch TV wherever whenever and on every screens. Anevia software solutions are used successfully in markets such as broadcasting, tier 1 and tier 2 telecommunications, and in many private and public companies. Headquartered in France, Anevia has regional offices in the USA and Dubai.
